

IBN SINA EMERGENCY DEPARTMENT

Paediatric Encounter Record - Clinical Data Sheet

SYNTHETIC RECORD - FICTIONAL PATIENT - NOT REAL PATIENT DATA
Generated for research prototype evaluation. Not for clinical use.

1. PATIENT IDENTIFICATION AND DEMOGRAPHICS

Medical record number	IBN-005
Patient name	Adam Khaled Nasser
Date of birth	2024-02-19
Age at presentation	2 years
Sex	Male
Accompanying guardian	Both parents present, highly anxious
ED arrival date/time	2026-08-13 22:50
Mode of arrival	Ambulatory, brought by family

2. INSURANCE AND ADMINISTRATIVE

Provider	Allianz Egypt - Private
Policy number	ALZ-EG-77410-3
Plan	Comprehensive family
Coverage status	Active
Co-payment	Nil - direct billing
Referral required	No

3. PRESENTING COMPLAINT

Chief complaint Sudden choking while eating nuts 6 hours ago, persistent cough since

History of presenting illness

Previously entirely well. Six hours ago, whilst eating peanuts unsupervised, the child had a sudden violent coughing and choking episode witnessed by his older cousin, with transient facial redness. The acute episode settled after approximately two minutes, but a persistent intermittent cough has continued since. NO fever at any point. NO preceding coryza, and NO preceding illness of any kind. Parents report he has otherwise been behaving and playing normally. A trial of nebulised salbutamol in the department produced no measurable change in air entry or saturations.

4. TRIAGE OBSERVATIONS AND VITAL SIGNS

Parameter	Value	Interpretation
Temperature (axillary)	36.9 C	Normal - AFEBRILE
Respiratory rate	38 /min	Mildly raised
Heart rate	124 /min	Mildly raised
SpO2 (room air)	93 %	Borderline
Blood pressure	96/58 mmHg	Normal
Capillary refill	<2 seconds	Normal
Weight	12.8 kg	50th-75th centile
AVPU	A - alert	Normal

5. CLINICAL EXAMINATION FINDINGS

- Alert, active, in no distress at rest. Speaking in normal short sentences.
- SUDDEN-ONSET history. Well until the choking episode 6 hours ago.
- ASYMMETRICAL FINDINGS: reduced air entry over the RIGHT hemithorax.
- MONOPHONIC wheeze localised to the right, not responding to salbutamol trial.
- Left side clear with normal air entry.
- No recession at rest; mild recession on exertion. No grunting, no stridor.
- AFEBRILE throughout. Feeding and drinking normally. Well hydrated.

6. PAST MEDICAL, DRUG, FAMILY AND SOCIAL HISTORY

Birth history	Term (39+4), spontaneous vaginal delivery, birth weight 3.5 kg. Uncomplicated.
Developmental	Normal milestones. Speaking in short sentences.
Immunisations	Fully up to date.
Past medical history	Entirely well. No respiratory illness of note. No wheeze ever. No atopy.
Past surgical history	None.
Prior hospital admissions	None.
Current medications	None.
Allergies	No known drug allergies. No known food allergies.
Family history	No asthma, no atopy, no cystic fibrosis, no immunodeficiency.
Social history	Lives with parents, only child. No household smokers. Nuts routinely present in the home.

7. LABORATORY RESULTS

Results available at the time of clinician review.

Investigation	Result	Reference range	Flag
White cell count	9.1 x10 ⁹ /L	4.0-12.0	Normal
Neutrophils	44 %	30-60	Normal
Lymphocytes	48 %	30-60	Normal
Haemoglobin	12.4 g/dL	11.5-14.5	Normal
Platelets	268 x10 ⁹ /L	150-450	Normal
C-reactive protein	5 mg/L	<5	Normal
Procalcitonin	0.05 ng/mL	<0.5	Normal
Sodium	140 mmol/L	135-145	Normal
Urea	3.6 mmol/L	2.5-6.5	Normal
Venous lactate	1.2 mmol/L	<2.0	Normal
Respiratory viral PCR	Negative	Negative	Normal
Blood culture	Not indicated - not collected	-	N/A

8. IMAGING REQUEST AND LINKED STUDY

Imaging order	Chest radiograph, AP inspiratory projection, urgent. Indication: acute onset respiratory symptoms following a witnessed choking episode, with unilateral reduced air entry on the right.
Linked image file	chest_xray/test/NORMAL/IM-0115-0001.jpeg
Image source	Kermany et al. chest X-ray dataset (CC BY 4.0)
Radiographer notes	Inspiratory AP film only. Expiratory film requested but not yet performed.
Radiology report	NOT YET REPORTED - awaiting interpretation

9. RECORD STATUS

Diagnosis	NOT YET ESTABLISHED - pending clinician assessment
Disposition	NOT YET DECIDED - pending clinician assessment
Record completeness	Registration, triage, clerking, labs and imaging request complete
Data classification	SYNTHETIC - fictional patient, safe for third-party API processing
